4. SECTION III: SSBs' STRATEGIC POSITIONING FOR 2028–2031

4. As the SSBs look toward the 2028–2031 period, they are reflecting on how to position their strategies and work plans to best serve the public interest within a rapidly changing global environment. This involves careful consideration of how the SSBs remain relevant, responsive, and impactful in their standard-setting and other related work. In that context, what do you believe the SSBs should aspire to achieve during their next strategy period, 2028–2031?

Your answer may touch on different dimensions, for example:

The relevance, responsiveness and impact of the SSBs' standard-setting and related activities.

Broader adoption and effective implementation of the SSBs' standards.

The SSBs' interaction and engagement with key stakeholder groups.

The SSBs' ability to serve the public interest.

The examples above are for illustrative purposes only and should not limit, direct, or otherwise influence your response.

Your answer should address the IAASB and IESBA collectively; however, you may wish to also highlight matters specifically for the IAASB or IESBA (if applicable, you could use separate headings to address such matters).

A key strategic focus for the SSBs in the 2028–2031 period could be to further enhance the global adoption and effective implementation of their standards. It will also be important for the standards to remain responsive to the evolving digital environment and the increasing demands of sustainability reporting.

11. SECTION V: AREAS FOR JOINT ACTIONS IN SSBs' WORK PLANS

8. Please share your views about areas of common interest and possible joint or parallel work plan topics (e.g., standard-setting or non-authoritative materials), or

other initiatives or activities.

It is important for the SSBs to acknowledge that the effectiveness and independence of the international standard-setting system depend on stable financial and human resources. Although the responsibility for securing funding and staffing rests with the PIOB and the IFEA, continued attention by the SSBs to the sustainability of these resources would help ensure that the standard-setting process remains robust, credible, and able to respond in a timely manner to emerging global issues.
