4. SECTION III: SSBs' STRATEGIC POSITIONING FOR 2028–2031

4. As the SSBs look toward the 2028–2031 period, they are reflecting on how to position their strategies and work plans to best serve the public interest within a rapidly changing global environment. This involves careful consideration of how the SSBs remain relevant, responsive, and impactful in their standard-setting and other related work. In that context, what do you believe the SSBs should aspire to achieve during their next strategy period, 2028–2031?

Your answer may touch on different dimensions, for example:

The relevance, responsiveness and impact of the SSBs' standard-setting and related activities.

Broader adoption and effective implementation of the SSBs' standards.

The SSBs' interaction and engagement with key stakeholder groups.

The SSBs' ability to serve the public interest.

The examples above are for illustrative purposes only and should not limit, direct, or otherwise influence your response.

Your answer should address the IAASB and IESBA collectively; however, you may wish to also highlight matters specifically for the IAASB or IESBA (if applicable, you could use separate headings to address such matters).

SOCPA believes that the SSBs should continue their work to enhance the relevance, responsiveness and impact of their standard setting projects and related activities; this is important in an era of rapid changes and instability. We believe that the SSBs should also continue enhancing its balanced interaction and engagement with key stakeholder groups and its ability to serve the public interest in different parts of the world.

11. SECTION V: AREAS FOR JOINT ACTIONS IN SSBs' WORK PLANS

8. Please share your views about areas of common interest and possible joint or parallel work plan topics (e.g., standard-setting or non-authoritative materials), or other initiatives or activities.

-Non-authoritative-materials addressing the use of emerging technologies in audit and review engagements (e.g. practical examples illustrating the use of Artificial Intelligence (AI) in audit procedures, explanatory guidance on the key ethical considerations associated with the use of emerging technologies in accounting services, and case studies demonstrating the implementation of critical audit and ethics standards in the context of emerging technologies).

-Non-authoritative-materials addressing the evolving structure and business models of accounting firms (e.g. practical examples illustrating the application of ethics and independence standards in circumstances where new ownership structures are implemented within accounting firms).

-Non-authoritative-materials providing more specific guidance on the sustainability assurance matters (e.g. assurance engagements relating to specific sustainability topics, or sustainability information within particular sectors); including matters related to the governance of sustainability assurance profession.

-Although the SSBs have undertaken standard-setting projects relating to the use of external experts in audit and assurance engagements, we believe they should continue their joint efforts to monitor and address the ethical and technical issues arising in this area. This remains particularly important in light of the increasing complexity of business models and operations as well as the growing demand for assurance engagements relating to specific subject-matters, which frequently require the involvement of experts from other professions.
